Editorial Policy. SIGNAL PROCESSING is an Interdisciplinary Journal presenting the theory and practice of signal processing. Its primary objectives are the following:
- Dissemination of research results and of engineering developments to all signal processing groups and individuals.
- Presentation of practical solutions to current signal processing problems in engineering and science.

The editorial policy and the technical content of the Journal are the responsibility of the Editor-in-Chief and the Editorial Board. The Journal is self-supporting from subscription income and contains a minimum amount of advertisements. Advertisements are subject to the prior approval of the Editor-in-Chief. The journal welcomes contributions from every country in the world.

Scope. SIGNAL PROCESSING incorporates all aspects of the theory and practice of signal processing (analogue and digital). It features original research work, tutorial and review articles, and accounts of practical developments. It is intended for a rapid dissemination of knowledge and experience to engineers and scientists working in signal processing research, development or practical application.

Subjects. Subject areas covered by the Journal include:
Signal Theory, Stochastic Processes, Detection and Estimation, Spectral Analysis, Filtering, Signal Processing Systems, Software Developments, Image Processing, Pattern Recognition, Optical Signal Processing, Digital Signal Processing, Multi-dimensional Signal Processing, Communication Signal Processing, Biomedical Signal Processing, Geophysical and Astrophysical Signal Processing, Earth Resources Signal Processing, Acoustic and Vibration Signal Processing, Data Processing, Remote Sensing, Signal Processing Technology, Speech Processing, Radar Signal Processing, Sonar Signal Processing, Special Signal Processing, Industrial Applications, New Applications.

Membership and Subscription Information:
Signal Processing (ISSN 0165-1684) is published in eight volumes (24 issues) a year. For 1997 Volumes 56–63 are scheduled for publication. Subscription prices are available upon request from the publishers. Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by surface mail except to the following countries where air delivery (S.A.L. – Surface Air Lifted) is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, People's Rep. of China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For the rest of the world, airmail charges are available upon request. Claims for missing issues will be honoured free of charge if made within six months after the publication date of the issues. For orders, claims, product enquiries (no manuscript enquiries) please contact the Customer Support Department at the Regional Sales Office nearest to you:

New York, Elsevier Science, P.O. Box 945, New York, NY 10159-0945, USA. Tel: (+1) 212-633-3730, [Toll Free number for North American Customers: 1-888-4ES-INFO (437-4636)], Fax: (+1) 212-633-3680, E-mail: usinfo-f@elsevier.com

Amsterdam, Elsevier Science, P.O. Box 211, 1000 AE Amsterdam, The Netherlands. Tel: (+31) 20-485-3757, Fax: (+31) 20-485-3432, E-mail: nlinfo-f@elsevier.nl

Tokyo, Elsevier Science, 9-15, Higashi-Azabu 1-chome, Minato-ku, Tokyo 106, Japan. Tel: (+81) 3-5561-5033, Fax: (+81) 3-5561-5047, E-mail: info@elsevier.co.jp

Singapore, Elsevier Science, No. 1 Temasek Avenue, #17-01 Millenia Tower, Singapore 039192. Tel: (+65) 434-3727, Fax: (+65) 337-2230, E-mail: asiainfo@elsevier.com.sg

For full membership information of the Association, possibly combined with a subscription at a reduced rate, please contact: EURASIP, P.O. Box 134, CH-10000 Lausanne 13, Switzerland.

US mailing notice – Signal Processing (ISSN 0165-1684) is published semimonthly by Elsevier Science B.V., Molenwerf 1, Postbus 211, 1000 AE Amsterdam, The Netherlands. Annual subscription price in USA US $1936 (subject to change), including air speed delivery. Periodicals postage rate is paid at Jamaica, NY 11431.

USA POSTMASTERS, Send address changes to Signal Processing, Publications Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Airfreight and mailing in the USA by Publication Expediting.

♾ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

This journal and the individual contributions contained in it are protected by the copyright of Elsevier Science B.V., and the following terms and conditions apply to their use:

Photocopying. Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

In the USA, users may clear permissions and make payment through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. In the UK, users may clear permissions and make payment through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London, W1P 0LP UK. In other countries where a local copyright clearance centre exists, please contact it for information on required permissions and payments.

Derivative Works. Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the publisher is required for resale or distribution outside the institution.

Permission of the publisher is required for all other derivative works, including compilations and translations.

Electronic Storage. Permission of the publisher is required to store electronically any material contained in this journal, including any article or part of an article. Contact the publisher at the address indicated.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the publisher.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior permission of the publisher, Elsevier Science B.V., Copyright and Permissions Department, P.O. Box 521, 1000 AM Amsterdam, The Netherlands.

Special regulations for authors. Upon acceptance of an article by the journal, the author(s) will be asked to tranfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Special regulations for readers in the USA. This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. The fee indicated on the first page of an article in this issue will apply retroactively to all articles published in the journal, regardless of the year of publication. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

Instructions to authors

General. Prospective authors are encouraged to submit manuscripts within the scope of the Journal. To qualify for publication, papers must be previously unpublished and not be under consideration for publication elsewhere. All material should be sent in quadruplicate (original plus three copies) to the Editor-in-Chief. Contributors are reminded that once their contribution has been accepted for publication, all further correspondence should not be sent to the Editor, but directly to the publishers (Editorial Department, Elsevier Science B.V., P.O. Box 1991, 1000 BZ Amsterdam, The Netherlands).

All manuscripts will be assessed by at least two (anonymous) referees.

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Accepted languages are English (preferred), French and German. The text of the paper should be preceded by abstracts of no more than 200 words in English, and, if possible, in French and German. Abstracts should contain the substance of the methods and results of the paper. Page proofs will be sent to the principal author with an offprint order form. Fifty offprints of each article can be ordered free of charge. Costs arising from alterations in proof, other than of printer's errors, will be charged to the authors.

All pages should be numbered. The first page should include the article title and the author's name and affiliation, as well as a name and mailing address to be used for correspondence and transmission of proofs. The second page should include a list of unusual symbols used in the article and the number of pages, tables and figures. It should also contain the keywords in English.

Figures. All illustrations are to be considered as figures, and each should be numbered in sequence with Arabic numerals. The drawings of the figures must be originals, drawn in black india ink and carefully lettered, or printed on a high-quality laser printer. Each figure should have a caption and these should be listed on a separate sheet. Care should be taken that lettering on the original is large enough to be legible after reduction. Each figure should be identified. The approximate place of a figure in the text should be indicated in the margin. In case the author wishes one or more figures to be printed in colour, the *extra* costs arising from such printing will be charged to the author. In this case 200 offprints may be ordered free of charge. More details are available from the Publisher.

Tables. Tables should be typed on separate sheets. Each table should have a number and a title. The approximate places for their insertion in the text should be indicated in the margin.

Footnotes in text. Footnotes in the text should be identified by superscript numbers and listed consecutively on a separate page.

References. References must be *in alphabetical order* in the style shown below:

Book	[1]	A.V. Oppenheim et al., Digital Signal Processing, Prentice Hall, Englewood Cliffs, NJ, 1975, Chapter 10, pp. 491–499.
Journal	[2]	F.J. Harris, On the use of windows for harmonic analysis with the discrete Fourier transform, Proc. IEEE 66 (1) (January 1978) 53–83.
Conference Proceedings	[3]	D. Coulon, D. Kayser, A supervised-learning technique to identify short natural language sentence, Proc. 3rd Internat. Joint Conf. on Pattern Recognition, Coronado, CA, 8–11 November 1976, pp. 85–89.
Contributed Volume	[4]	E.F. Moore, The firing squad synchronization problem, in: E.F. Moore (Ed.), Sequential Machines, Selected Papers, Addison Wesley, Reading, MA, 1964, pp. 213–214.

Fast Communications. Papers for the Fast Communications section should be submitted by electronic mail to the Editor-in-Chief: Professor M. Kunt. Papers should be a maximum of 2,500 words in length (approximately 6 printed journal pages for Signal Processing). Submissions will be subject to the same editorial selection criteria as regular papers, but must cover *a new theoretical development with clear proof of novelty*. Reviews will be dispatched electronically and decisions will be binary (yes/no) to avoid publication delays. Please ensure your complete postal and e-mail address are indicated on the title page. As no page proofs will be sent to the authors, the presentation should be very clear. For Fast Communications, the figures should be provided in Encapsulated Postscript (eps) format.

To ensure fast publication, the manuscript should be written in LaTeX using the document styles of Elsevier Science B.V. Move all files needed (TeX source, eps-files, style and bibliography files) into one directory. Remove all compilation files (*.log, *.lof, *.dvi, *.aux, . . .). Rename the main TeX source into *review.tex* and archive (tar), compress and uuencode this directory, and e-mail the uuencoded file to: fastcom@ltssun11.epfl.ch. Authors who comply with the above conditions will have their Fast Communication published on the EEE-Alert Server within three weeks of acceptance.

LaTeX files of papers that have been accepted for publication may be sent to the Publisher by e-mail or on a diskette (3.5" or 5.25" MS-DOS). If the file is suitable, proofs will be produced without rekeying the text. The article should be encoded in P-LaTeX, standard LaTeX, or AMS-LaTeX (in document style 'article'). The ESP-LaTeX package, together with instructions on how to prepare a file, is available from the Publisher. It can also be obtained through the Elsevier WWW home page (http://www.elsevier.nl) or using anonymous FTP from the Comprehensive TeX Archive Network (CTAN). The host-names are: ftp.dante.de, ftp.tex.ac.uk; the CTAN directory is: /tex-archive/macros/latex/contrib/supported/elsevier. *No changes* from the accepted version are permissible, without the explicit approval by the Editors. The Publisher reserves the right to decide whether to use the author's file or not. If the file is sent by e-mail, the name of the journal, *Signal Processing*, should be mentioned in the subject field of the message to identify the paper. Authors should include an ASCII table (available from the Publisher) in their files to enable the detection of transmission errors. The files should be mailed to: Ineke Kolen, Elsevier Science B.V., P.O. Box 103, 1000 AC Amsterdam, Netherlands. Fax: + 31 20 4852829. E-mail: c.kolen@elsevier.nl.

For the purpose of further correspondence the manuscript should end with a complete mailing address, preferably including e-mail address, of at least one of the authors.

EUROPEAN ASSOCIATION FOR SIGNAL PROCESSING

Administrating Committee

President: U. Heute, LNS/Techn. Fakultät/CAU, Kaiserstraße 2, 24143 Kiel, Germany

Secretary-treasurer: P. Grant, Electrical Engineering, Univ. of Edinburgh, Edinburgh EH9 3JL, UK

Workshops Coordinator: W. Mecklenbräuker, Institut für Nachrichtentechnik, TU Wien, Gußhausstraße 25/389, A-1040 Wien, Austria

Brussels Liaison: J. Vandewalle, Katholieke Universiteit Leuven, Kardinaal Mercierlaan 94, B-3001 Leuven, Belgium

Past President: M. Bellanger, CNAM, 292 rue Saint-Martin, 75141 Paris Cedex 03, France
